ANNOUNCEMENT 229

NUMBER 3, OCTOBER 1986

Symposium on Synthesis in Solid State Chemistry:
Frontier Structures and Novel Results

Guest Editor: Robert E. McCarley

INTRODUCTION
ROBERT E. MCCARLEY. Introduction to the Symposium 231
STEVEN P. CHRISTIANO AND THOMAS J. PINNAVAIA. Intercalation in Montmorillonite of Molybdenum Cations Containing the Mo_6Cl_8 Cluster Core 232
C. J. CHEN, M. GREENBLATT, AND J. V. WASZCZAK. Lithium Insertion Compounds of $LiFe_5O_8$, $Li_2FeMn_3O_8$, and $Li_2ZnMn_3O_8$ 240
RAYMOND G. TELLER, MARK R. ANTONIO, JAMES F. BRAZDIL, AND ROBERT K. GRASSELLI. New Materials Synthesis: Characterization of Some Metal-Doped Antimony Oxides 249
PHILIP J. SQUATTRITO, STEVEN A. SUNSHINE, AND JAMES A. IBERS. Some Substitutional Chemistry in Known Ternary and Quaternary Chalcogenides 261
XIANG-MU SHEN AND ABRAHAM CLEARFIELD. Phase Transitions and Ion Exchange Behavior of Electrolytically Prepared Manganese Dioxide 270
H. F. FRANZEN. The Preparation of Novel Metal-Rich Transition-Metal Sulfides and Selenides by High-Temperature Techniques 283

D. J. Buttrey, J. M. Honig, and C. N. R. Rao. Magnetic Properties of Quasi-Two-Dimensional La_2NiO_4 287
Eric G. Derouane and Zelimir Gabelica. Role of Selected Synthesis Variables in Nucleation and Growth of Zeolite ZSM-5 296
Jean Rouxel. Synthesis and Properties of Low-Dimensional Metal Chalcogenides 305
J. Livage. The Gel Route to Transition Metal Oxides 322
Shiou-Jyh Hwu and John D. Corbett. Metal–Metal-Bonded Scandium Cluster ($Sc_7Cl_{12}Z$) and Infinite Chain (Sc_4Cl_6Z) Phases Stabilized by Interstitial Boron or Nitrogen (Z) 331
Kwang-Hwa Lii, Robert E. McCarley, Sangsoo Kim, and Robert A. Jacobson. Synthesis and Structure of Ternary Molybdenum Oxides $M Mo_8O_{10}$ (M = Li or Zn) Having Orthogonal Nonintersecting Octahedral Cluster Chains 347
D. M. Schleich and M. J. Martin. Synthesis of Novel Molybdenum Chalcogenides 359
J. D. Passaretti, R. R. Chianelli, A. Wold, K. Dwight, and J. Covino. Preparation and Properties of the Systems $Co_{1-x}Rh_xS_2$, $Co_{1-x}Ru_xS_2$, and $Rh_{1-x}Ru_xS_2$ 365
R. Hoppe. New Routes in the Synthesis of Metal Oxides, I 372

Author Index for Volume 64 387

The Subject Index for Volume 64 will appear in the December 1986 issue as part of a cumulative index for the year 1986.

Information for Authors

The *Journal of Solid State Chemistry* is a research journal devoted to the chemical, structural, thermodynamic, electronic, magnetic, and optical properties and processes of solids. Theoretical and experimental contributions are both welcome. Critical reviews are occasionally presented in selected rapidly developing fields. The journal also carries a Letters Section.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Solid State Chemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Manuscripts may be presented as articles (i.e., conventional full-length expositions) or notes (brief rapid communications of important new work). Notes are limited to 1200 words and are given accelerated review and publication. English, French, and German are the official languages of the Journal but submission of articles in English is encouraged. Manuscripts should be submitted to *Journal of Solid State Chemistry*, Editorial Office, Seventh Floor, 1250 Sixth Avenue, San Diego, California 92101.

Manuscripts should be submitted in quadruplicate—double-spaced on one side of 21.5 × 28 cm paper. Headings of major sections should be typed in capital letters and centered on the page. Each page of the manuscript should be numbered. Page one should consist of the manuscript title, the author's name, and the author's affiliation. For multiple authors, the author to whom correspondence is to be addressed should be indicated. Page two should consist of an abstract (50–150 words) suitable for use in *Chemical Abstracts*. The American Chemical Society's *Handbook for Authors* or the *Style Manual* of the American Institute of Physics should be followed regarding matters of style and abbreviation.

Tables. Tables should be numbered with Roman numerals in a sequence corresponding to the order of citation in the text. Footnotes to tables are to be placed directly below the table and should be indicated by superscript, lowercase italic letters (^{a,b,c}). Tables longer than two manuscript pages should be submitted as clear, sharp glossy photographs. They will be reproduced by photoreproduction and should be designed to fit the Journal page after 50% reduction in each dimension. Errors in such tables cannot be corrected in proof.

Auxiliary Material. In lieu of publication, unusually long tables and sequences of repetitive figures must be deposited with the National Auxiliary Publications Service (NAPS). In particular, structure factor tables must be deposited if, in a clear, proportional, photoreduced format, they would occupy more than one Journal page (this corresponds to a limit of about 1000 F_o and F_c).

For material to be deposited, a deposit fee of $25.00 for up to 98 pages of standard-size or 49 pages of oversize deposited material is to be paid by the authors to NAPS. Appropriate transmittal forms to accompany the deposited material are supplied to the authors by the Editor at the time a paper is accepted for publication. The following footnote (wherein missing numbers are to be inserted by the author in page proof) should be used to reference deposited material.

See NAPS document No. ____ for ____ pages of supplementary material. Order from ASIS/NAPS. Microfiche Publications, P.O. Box 3513, Grand Central Station, New York, NY 10163. Remit in advance $4.00 for microfiche copy or for photocopy, $7.75 up to 20 pages plus $.30 for each additional page. All orders must be prepaid. Institutions and Organizations may order by purchase order. However, there is a billing and handling charge for this service of $15. Foreign orders add $4.50 for postage and handling, for the first 20 pages, and $1.00 for additional 10 pages of material, $1.50 for postage of any microfiche orders.

Figures. Figures should be submitted as glossy prints or as original black ink drawings, no larger than 21.5 × 28 cm. Press type is not acceptable. It is important that lettering on drawings be done with a lettering set and be planned to fit the proportion of the printed page. Lettering on the original should be large enough to be legible after reduction of the figure to single-column width. The difference in type size within a figure should be no more than approximately 15%. The caption of each axis should be lettered parallel to its axis. Background grids should not be included. For halftone reproductions, glossy, high-contrast, black and white prints should be submitted. Illustrations in color can be accepted only if the authors defray the cost. Each figure should be identified on the back with the author's name and figure number. Figures are to be cited in the text by consecutive Arabic numerals. Figure captions should be typed as a list on a separate page.

Equations. Equations should be typewritten or clearly handwritten with an Arabic number if necessary for reference placed in parentheses to the right of equation. Reference to equations should use the form "Eq. (3)."

Footnotes. Footnotes to the text should be indicated by consecutive superscript numbers and listed on a separate page at the end of the paper.

References. References should be cited in the text by consecutive underlined numbers in parentheses. The references must appear on a separate sheet, listed in numerical order, i.e., in accordance with order of citation in the text. After the reference number, the author's initials, last name, journal name, volume, initial page number, and year (in parentheses) should be listed in that order. Abbreviations for journal names should follow the style of *Chemical Abstracts Service Source Index,* 1985. For book references, give the author's name, name of book (in quotes), Editor's name (if any), edition (if other than the first), chapter or page number, publisher's name, place and year of publication.

Letters to the Editor. Letters to the Editor will be accepted for publication subject to approval by the communicators, who upon their recommendation for acceptance will forward the manuscript directly to the Editorial Office. Each article should indicate clearly the novelty and urgency of the contribution; it may be helpful to document this more explicitly in an accompanying letter of transmittal. Each communicator must satisfy himself that the content is not only scientifically sound, but also likely to have such impact as to merit rapid publication. Accepted manuscripts will be published on an accelerated publication schedule. Letters should be no longer than 1200 words, with an absolute minimum of figures, tables, and references; an abstract not exceeding 150 words should also be provided. Manuscripts should be sent to the Editor, an Associate Editor, or to one of the following members of the Editorial Advisory Board: E. F. Bertaut, J. B. Goodenough, P. Hagenmuller, A. Rabenau, C. N. R. Rao, or A. Wold. Full addresses for these Board members are listed on the inside front cover of the journal.

Book Reviews. Book Reviews are published on an irregular schedule, and are limited to books whose content bears directly on the general area of solid state chemistry. Reviews should be submitted directly to the Editor for Book Reviews, Dr. Edward Kostiner, Department of Chemistry and Institute of Materials Science, University of Connecticut, Storrs, Connecticut 06268.

Proofs. Unfolioed page proofs will be sent directly to the author from the printer together with order forms for reprints. There is no page charge.
